Veneers to improve tooth shape

Tooth reshaping to canine tooth to look like the missing incisor tooth.

Dark Front Tooth

Old chipped Fillings / Tooth Wear

This patient disliked the chipped and thin appearance of her front teeth. Using E.max crowns we were able to achieve the smile our patient desired.
**Missing tooth**

This young patient never grew the missing tooth and was left with a gap. An single tooth implant crown was used to fill the space and veneers were placed on the front teeth to achieve the best aesthetic result.

**Corrective gum surgery**
